

ANNA UNIVERSITY AU TVS CENTRE FOR QUALITY MANAGEMENT

DMAIC with R Programming

Quality Improvement

One Day Intensive Training Programme

Date: August 26th 2018

Fee: ₹ 1,250/-

Six Sigma has arisen in the last two decades as a breakthrough Quality Management Methodology for solving problems and improving the quality of processes. It is a scientific method that uses the most powerful tool. For the analysis of data, Six Sigma requires the use of statistical software - R an Open Source option that fulfills this requirement.

Objective is to show how R can be used as the software tool in the development of Six Sigma projects.

R is a system for statistical computing and graphing. It comprises a language, and a software environment. The R system has been increasingly used in academia and research from its beginning, and it is becoming a real alternative to commercial software in corporate environments. The R system is open source, and it is available for a number of platforms and configurations. The advantages of using R for teaching Decision Sciences and Technologies are reviewed in the paper, along with its reproducible research capabilities.
